

Nufarm Insight

Comet 400® & the new 60L Envirodrum® – the new shining star in broadleaf weed control.

Nufarm has long been recognised as a market leader in Australian crop protection by delivering innovative technologies to Australian farmers and rural distributors. This commitment to continuous improvement has led to another exciting breakthrough.

The new 60 litre Envirodrum® with a translucent body is set to take delivery systems of agricultural products to a new level. There are many benefits of the new 60 litre drum including:

- The translucent container walls enables you to make a quick, easy and accurate assessment of the level of remaining product.
- Colour coded tops and bases with translucent body to enable easy identification of the product even if the label sleeve is damaged or missing.
- Easy product identification in-store and on farm ensures the correct product selection.
- Security sealed to reduce risk of product contamination.

- Returnable drum eliminating the need to rinse and dispose of 20 litre drums.
- Flexible and easy to use with a micromatic fitting.
- Convenient pack size that is easier for growers to handle and manage.
- Convenient pack size for products with higher loaded formulations and lower use rates such as Comet® 400.

Nufarm are committed to the ongoing development of innovative packaging solutions to be able to meet the ever-changing demands of Australian growers. The 60 litre Envirodrum is another example of Nufarm's commitment to more efficient product delivery systems.
