

Bonser is a unique adjuvant (ammonium sulphate+wetter and surfactants) from Nufarm. Launched in Australia to act as an adjuvant and water conditioner it is now available in the UK.

Strengths

- Improved robustness of activity especially at lower glyphosate rates/per hectare
- Water conditioner
- Good performance on broadleaved perennials
- Broad spectrum activity
- Ideally used when using low water volumes and rates of CREDIT

Adjuvant effect – broadleaved weeds

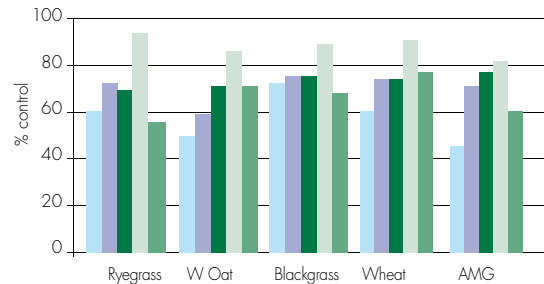

Replicated weed screen – Manningtree 2004

- Standard glyphosate 360g/ha
- Standard glyphosate 540g/ha
- CREDIT 360g/ha + Bonser
- CREDIT 540g/ha + Bonser
- CREDIT 240g/ha + Binder

Adjuvant effect – Docks

Replicated weed screen – Manningtree 2004

- Standard glyphosate 360g/ha
- Standard glyphosate 540g/ha
- CREDIT 360g/ha + Bonser
- CREDIT 540g/ha + Bonser
- CREDIT 240g/ha + Binder

Replicated Dock trial

Manningtree 22 Days after treatment 2003

Untreated Standard glyphosate 1800g CREDIT 1800g + Bonser

Control of Docks is greater with the use of Bonser as shown 22 days after treatment.
