

4-SPEED™ Herbicide

4-Speed™ herbicide contains the active ingredients 2,4-D, mecoprop-p, dicamba and pyraflufen-ethyl.

Deader. Faster.

Faster, Better Broadleaf Control, Because You Can't Afford to Wait.

4-Speed™ herbicide provides fast, effective post-emergent control of a wide range of broadleaf weeds in a variety of settings including golf courses and professional turf. The power behind the performance is a unique blend of active ingredients. In 4-Speed, proven performers 2,4-D, dicamba and MCP-P are aided by pyraflufen-ethyl and a blend of premium emulsifiers to add speed to performance.

In as little as 24 to 48 hours after application, superintendents, professional landscapers, and groundskeepers will begin to see control of troublesome weeds such as dandelion, white clover, buckhorn plantain and other broadleaf weeds.

KEY PERFORMANCE BENEFITS

- Fast acting – results are visible within approximately 24 to 48 hours
- Proven combination of four active ingredients
- Broad-spectrum control

APPLICATION RECOMMENDATIONS

Use only medium or coarser spray nozzles to minimize drift and do not apply at wind speeds over 10 mph or during temperature inversions. See product label for complete application instructions.

BAHIAGRASS, BLUEGRASS, COMMON BERMUDAGRASS, FESCUE, RYEGRASS AND ZOYSIAGRASS

Use rate: 3 to 4 pts/A

Spray volume: 3 gal/A to 220 gal/A

Some hybrid bermudagrass may be sensitive to this product. Use reduced rates if grass is stressed from heat or drought. Higher water volumes may be used when tank-mixed with a turf fertilizer. Follow fertilizer labels.

BENTGRASS

Use rate: 1.8 pt/A

Spray volume: 145 gal/A

Avoid applications during periods of high heat, high humidity or inadequate moisture.
