

FirstPick™

Plant Growth Regulator

FirstPick™ contains ethephon.

Faster, More Consistent Boll Opening with FirstPick™

FirstPick™ harvest aid accelerates the opening of mature unopened cotton bolls so you can begin picking sooner. Only FirstPick contains a proprietary synergist to deliver rapid defoliation of cotton plants when used in combination with a proven defoliant such as FreeFall®. The synergist improves the activity of ethephon by increasing its uptake and movement within the plant.

FirstPick allows you to use a reduced rate of defoliant while improving consistency and speeding leaf drop, which means better results and less trash for maximum lint quality.

KEY PERFORMANCE BENEFITS

Cotton harvest aid that offers excellent boll opening and improves defoliation

Enhanced ethephon means FirstPick begins to work quickly, even in variable weather conditions

Provides the most consistent boll opening available, plus improves the performance of defoliants

Easy-to-use, totally water soluble formulation pours and mixes effortlessly, sprays uniformly without clogging and washes off equipment cleanly and easily

ACTIVE INGREDIENTS

ethephon and urea sulfate

% ACTIVE INGREDIENTS

18.3% and 58.6%

FORMULATION

liquid

CHEMICAL FAMILY

phosphonic acid
and monocarbamide
dihydrogen sulfate

EPA REGISTRATION

352-674

MODE OF ACTION

Plant growth regulator with systemic properties. Penetrates into the plant tissues, and is decomposed to ethylene, which affects the growth processes.

RESTRICTED USE

no

SIGNAL WORD

danger

PACKAGING INFORMATION

2 x 2.5 gal
30 gal drum

LABELED CROPS

Cotton

LABELED USES

Defoliation
Boll opening

FirstPick™

Plant Growth Regulator

APPLICATION RECOMMENDATIONS

FirstPick may be applied by ground or air. For ground application, apply as a dilute spray in 10 to 30 gallons of water per acre. For aerial application, apply as a dilute spray in 3 to 10 gallons of water per acre.

Two applications of FirstPick are allowed per year, not to exceed 3.5 quarts per acre (equivalent to 2.0 pounds ethephon active ingredient per year).

Do not harvest within 7 days of FirstPick application.

RATES

Stand alone: Apply 3.0 to 3.5 quarts per acre.

Tank-mix: The most consistent defoliation and regrowth inhibition is achieved with tank-mixes of FirstPick and a labeled defoliant such as FreeFall. Apply FirstPick at 1.5 to 2.0 quarts per acre in tank-mix with a defoliant for defoliation and boll opening.
