	Phytophthora (<i>Phytophthora</i> spp.)	<u>MANCOZEB 800</u> 120 g/ 100L

- Mancozeb may have an impact on some IPM systems (beneficial insects).
- This permit is for a tank-mix of registered Acrobat products in combination with registered mancozeb products. Both products are required for effective control of the diseases listed.

Critical Use Comments:

- Apply before disease appears when conditions favour infection.
- Apply as a foliar application with boom sprayer, hand-held boom or equivalent.
- Apply by low volume application of concentrated spray by sprayer designed and set up for concentrate spraying.
- DO NOT apply more than 4 sprays per crop. Applying two consecutive sprays of dimethomorph + mancozeb 7 to 14 days apart then alternating to a fungicide from another chemical group. Use shorter intervals when conditions favouring infection are creating a high risk.
- For fungicide resistance management Acrobat is a Group X fungicide. Limit use of this product to periods when conditions favour disease development. Maintain a regular protectant spray program.

Jurisdiction:

ALL States (except VIC).

[Note: Issue of a permit is not required in Victoria where this off-label use is allowed under State Control-of-use legislation]

Additional Conditions:

This Permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

TO AVOID CROP DAMAGE:

The sensitivity of some species and varieties of the crops to be treated under this permit has not been fully evaluated. It is advisable, therefore, to only treat a small number of plants to ascertain their reaction before treating the whole crop.
