For information on old varieties please contact the Nufarm Technical Helpline

IMPORTANT NOTE

Please note straight chlorotoluron is under phased revocation. Last sales of Atol or Lentipur 500 from distributor to end user are 31 August 2010. The product must be used up and no longer stored by the end user after 31 August 2011. Buckler is unaffected by this revocation and can continue to be used.

Always follow all crop safety cautions on the label. This variety list is unique to Nufarm formulations of chlorotoluron. Do not use this list for any other product containing chlorotoluron.
