

# SureGuard<sup>®</sup>

## HERBICIDE

## TAKE A CLOSER LOOK AND SEE THE DIFFERENCE

**SUREGUARD<sup>®</sup> MAY LOOK SIMILAR TO OTHER HERBICIDES ON PAPER,  
BUT IT IS A VERY DIFFERENT PRODUCT.**

SureGuard is a highly effective herbicide which delivers different weed control results than competing herbicides used on dormant Bermudagrass. Understand the differences and your weed control needs. SureGuard outperforms traditional pre-emergence herbicides by not only controlling weeds effectively without influencing turfgrass root development, but also by providing post-emergence control of existing weeds.

#### **SUREGUARD PERFORMANCE BENEFITS:**

- Provides residual and post-emerge control of annual bluegrass
- Provides effective pre- and post-emerge control of annual winter weeds including bittercress and mustard
- When mixed with pre- and post-emerge herbicides, improves spectrum and speed of control

<b>HERBICIDE CHARACTERISTICS</b>	<b>SUREGUARD</b>
ROOT INHIBITING HERBICIDE	NO
PRE-EMERGE POA CONTROL	YES
POST-EMERGE POA CONTROL	YES
IMPROVES GLYPHOSATE SPECTRUM WHEN MIXED	YES
IMPROVES GLYPHOSATE SPEED WHEN MIXED	YES
PRE-EMERGE ANNUAL GRASS CONTROL	YES
PRE-EMERGE SUMMER BROADLEAF WEED CONTROL	YES
PRE-EMERGE WINTER ANNUAL WEED CONTROL	YES
POST-EMERGE WINTER ANNUAL WEED CONTROL	YES
