KEY PERFORMANCE BENEFITS

- Controls a broad spectrum of annual broadleaf and grass weeds including most broadleaf weeds resistant to glyphosate
- Offers long-lasting residual control
- Flexible rotation options
- Enhanced speed of control on a broader weed spectrum in labeled burndown programs

KEY PERFORMANCE BENEFITS

- Below-ground burndown: kills resistant weeds, roots and all
- Dual auxin mode of action for synergistic control
- Optimized ratio for use closer to soybean planting
- Ester formulation for dependable cool-weather performance
- Spitfire® is now labeled for a 7 day preplant interval in soybeans

KEY PERFORMANCE BENEFITS

- Offers post-emergence control of the most significant broadleaf weeds including glyphosate and ALS-resistant weeds
- Formulated for better performance in cool weather and will not freeze
- Excellent for fall and early spring burndown programs

KEY PERFORMANCE BENEFITS

- Excellent control of broadleaf weeds including ALS-resistant Kochia
- Can be tank-mixed with other broadleaf and grass herbicides as well as most fungicides, insecticides and foliar fertilizers
- Offers rotational flexibility to next year's crop

KEY PERFORMANCE BENEFITS

- Control of tough broadleaf weeds such as kochia, Russian thistle, pigweed, mustards, prickly lettuce and lambsquarters
- Systemic product with residual soil activity
- Non-toxic to microorganisms
- Noxious weed and brush control
- Tank-mix compatible with many other herbicides

KEY PERFORMANCE BENEFITS

- Excellent post-emerge weed control with residual activity for up to six weeks
- Offers excellent crop safety
- Wide application window
- Excellent tank-mix partner

KEY PERFORMANCE BENEFITS

- Outstanding control of tough broadleaf weeds
- Can be tank-mixed with grass and other broadleaf herbicides to broaden weed control spectrum
- Offers excellent crop safety
- Flexible rotation options

KEY PERFORMANCE BENEFITS

- Made with high quality surfactants, allowing easy mixing with other herbicides and liquid fertilizers
- The only solventless 6lb. Ester – low use rates reduce the chemical load and allows convenient handling and mixing
- Stays in suspension longer than other 2,4-D herbicides, especially in hard water situations
- The low odor formulation is ideal for areas where there are odor concerns
- Provides better crop safety for over-the-top applications

KEY PERFORMANCE BENEFITS

- Optimized ratio enhances broad-spectrum preplant burndown control on more than 65 weeds in preplant corn, cotton, and soybeans
- Excellent for fall and early spring burndown programs
- Premix formula results in rapid knockdown of the toughest weeds, including herbicide resistant weeds
- Works with a wide variety of adjuvants and offers flexible crop rotations

KEY PERFORMANCE BENEFITS

- Contains proprietary Dual-Salt Technology™; delivers excellent crop safety
- Takes on the toughest weeds with quick burndown and complete control
- Excellent tank-mix compatibility, even in hard water environments
- Fast translocation activity and rainfastness
