

Cheetah®

Satisfaction: Cleaner. Quicker. Cheetah®.

Cheetah® herbicide provides fast, effective control to eliminate the toughest weeds even those resistant to glyphosate and multiple herbicide classes. When used over the top of LibertyLink® or glufosinate tolerant traits it offers advantages over glyphosate-tolerant systems plus has many similar benefits.

WORKS IN DAYS, NOT WEEKS

- The only non-selective alternative to glyphosate for over-the-top use
- Allows growers to rotate non-selective herbicides across multiple crops
- Non-selective, post-emergence control of broadleaf and grass weeds, including weeds resistant to glyphosate and multiple herbicide classes
- Fast control, kills weeds in days, minimizing weed competition for maximum yield
- Compared to competitive HT systems, Cheetah offers:
 - Lower volatility and reduced sprayer cleanout concerns
 - Mitigates significant drift issues, contamination risk or buffer requirements
- Rainfast in four hours

GLUFOSINATE TOLERANCE OF SEEDS

- Contact the seed manufacturer or seed distributor to determine if the seed variety is designated and supported as glufosinate tolerant

EPA REG. NO.	71368-112
ACTIVE INGR.	glufosinate (24.5%)
FORMULATION	liquid
CHEM. FAMILY	phosphinic acid
GROUP NO.	10
MODE OF ACT.	glutamine synthetase inhibitor
REI	12 hours
SIGNAL WORD	warning
RESTRICTED	no
PACKAGE SIZE	2 x 2.5 gal, 265 gal tote, bulk

Grow a better tomorrow.

KEY USES

Post-emerge on canola, corn, cotton, and soybean designated as LibertyLink® or glufosinate tolerant crops

Broadcast burndown before planting or prior to crop emergence or any conventional or transgenic variety of canola, corn, cotton, soybean, or sugarbeet

KEY WEEDS CONTROLLED

(See product label for complete list)

Controls more than 130 annual, biennial, perennial grass and broadleaf weeds including: giant ragweed, kochia, johnsongrass, lambsquarters, marestalk (*horseweed*), morningglory spp, Palmer amaranth, waterhemp

USE SUMMARY

USE RATES: LIBERTYLINK AND GLUFOSINATE TOLERANT* CROPS

CROP	BURNDOWN	IN-SEASON APPLICATIONS	SEASON MAX
Soybean Use Pattern	29-36 fl oz/A	1 application at 29 fl oz/A	65 fl oz/A
Corn	29-36 fl oz/A	None	44 fl oz/A
LL Sweet Corn	29-36 fl oz/A	None	40 fl oz/A
Cotton Use Pattern 1	29 fl oz/A	2 applications at 29 fl oz/A	87 fl oz/A
Cotton Use Pattern 2	30-43 fl oz/A	1 application at 29 fl oz/A	72 fl oz/A

*GLUFOSINATE TOLERANCE OF SEEDS: Contact the seed manufacturer or seed distributor to determine if the seed variety is designated and supported as glufosinate tolerant.

USE RATES: CONVENTIONAL AND NON-LIBERTYLINK CROPS

CROP	BURNDOWN	IN-SEASON APPLICATIONS	SEASON MAX
Canola, Corn, Soybean, Sweet Corn, Sugarbeet	29-36 fl oz/A	None	36 fl oz/A
Cotton	29 fl oz/A	2 applications at 29 fl oz/A*	87 fl oz/A
Cotton	30-43 fl oz/A	1 application at 29 fl oz/A*	72 fl oz/A

*Post application in non-LibertyLink cotton can ONLY be applied with a hooded sprayer. See product label.

Apply a minimum of 29 fl oz/A of Cheetah® for burndown of existing weeds just prior to planting or prior to crop emergence.

Residual herbicides applied at burndown helps ensure optimal control, particularly if environmental conditions delays a timely post Cheetah application.

Cheetah alone controls marestalks, ragweeds, and Palmer amaranth however may not provide adequate control of all weeds typically found in no-till burndown situations.

Apply in combination of 2,4-D esters and/or Panther® SC (flumioxazin), Panther D (flumioxazin + 2,4-D), Credit® Xtreme (glyphosate), metribuzin or atrazine.

A tankmix of Cheetah and glyphosate may result in reduced grass control.

Check with your chemical retailer or university extension for localized adjuvant and tankmix recommendations to enhance control if needed.

CHEETAH HERBICIDE PROGRAMS FOR GLUFOSINATE TOLERANT CROPS

PROGRAM	RESIDUAL PP/PPI/PRE	1ST POST APP.	2ND POST APP.
SOYBEAN			
Herbicide Program	Use residual: Panther® SC, Panther® D, Cloak®	Cheetah® @ 29 fl oz/A	Cheetah® @ 29 fl oz/A
Delay Program - conditions prevent timely application	Use residual: Panther® SC, Panther® D, Cloak®	Cheetah® @ 36 fl oz/A	Cheetah® @ 29 fl oz/A
CORN			
Herbicide Program	Use residual: Panther® SC, Panther® D	Cheetah® @ 22 fl oz/A	Cheetah® @ 22 fl oz/A
Delay Program - conditions prevents timely application	Use residual: Panther® SC, Panther® D	Cheetah® @ 36 fl oz/A	Cheetah® @ 29 fl oz/A
COTTON			
Option 1	Use residual: Panther® SC, Panther® D	Cheetah® @ 29 fl oz/A	Cheetah® @ 29 fl oz/A *3rd Post Application - Cheetah® @ 29 fl oz/A
Option 2	Use residual: Panther® SC, Panther® D	Cheetah® @ 29 fl oz/A	Cheetah® @ 29 fl oz/A

CHEETAH ON INVIGOR CANOLA

Cheetah herbicide should be applied as follows @ 22 fl oz/A:

- Apply over the top of InVigor® canola when weeds are no more than 3 to 4" tall
- A second application can be made a minimum of 10 days later to address new weed pressure, with a season maximum of 44 fl oz/A

Apply AMS at 1.5 lb/A to 3 lb/A. For additional grass control a Group 1 herbicide can be tank mixed at labeled rates provided they are labeled for the timing and application.

See label for complete directions for use.
