

Anuew™

ONE BETTER.

For Managing Growth, Improving Quality and Appearance of Turfgrass

Anuew™ is a Nufarm proprietary PGR tool for cool- and warm-season turf management. Anuew contains prohexadione calcium, a powerful active ingredient that can be applied to all managed turf areas including golf greens, tees, fairways and rough, residential and commercial lawns, sod farms, sport fields and similar areas.

This exciting breakthrough in growth regulation slows vertical growth resulting in less mowing, less clippings and improved turf quality.

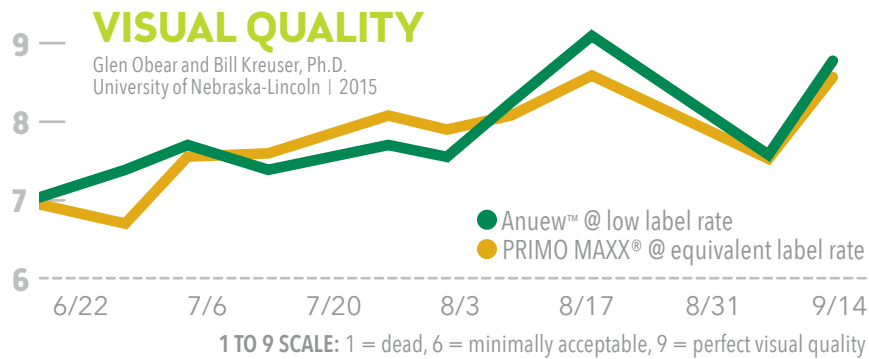

EPA REG. NO. 1001-91
 ACTIVE INGR. prohexadione calcium (27.5%)
 FORMULATION extruded granule
