

WeedMaster® and Lion® formulations going green

This spring Nufarm will be making a minor change to all WeedMaster and Lion products by changing the colour of the formulation to green. This will affect the following brands:

- WeedMaster G360
- WeedMaster TS470
- WeedMaster TS540
- Lion Herbicide
- Lion 490DST

This minor change has been made to enable Nufarm to improve manufacturing efficiencies and have a consistent colour across the glyphosate range. This colour change will be in stores from now onwards.

While the appearance will change, farmers and growers can be assured that the formulations will continue to be the same high quality that is expected from a Nufarm product.

Ends.
