COMPANY ANNOUNCEMENT

28 May, 2010

Nufarm comments on global glyphosate segment

Nufarm Limited today made a number of comments on the global glyphosate segment. This follows announcements from Monsanto that it is repositioning its glyphosate business and has lower expectations for glyphosate earnings. Nufarm has commented that the adjusted earnings guidance relating to Monsanto's glyphosate business has limited implications for Nufarm's own business and earnings outlook.

An audio file of Nufarm's comments - made during a conference call with sell-side analysts this morning - is now available on the Nufarm corporate website (www.nufarm.com).
