RELEASE

4 November 2015

Nufarm to reorganise Pipe Road manufacturing operations Aimed at efficiency improvements

Nufarm Australia today announced the reorganisation of its manufacturing workforce at the Pipe Road, Laverton site.

This operational reorganisation, in conjunction with the ongoing Australian and New Zealand regional manufacturing rationalisation program, is aimed at ensuring the business will be more competitive, more responsive and more efficient.

As a result, the manufacturing organisational structure for the facility will change and some roles will be made redundant.

The Pipe Road site remains a key manufacturing facility for the company. The announced reorganisation follows an extensive review of the site's operations, and is linked to a manufacturing performance improvement program currently being implemented at the facility.

Customers will not be impacted as a result of these changes.

Nufarm continues to be committed to manufacturing and delivering high quality products and services that are tailored to the needs of Australian and New Zealand customers and farmers.
